ROD POLISHER

ROD POLISHER

AUTOMATIC/MANUAL FEED SYSTEM

APR-24 /MPR-24

Our rod polishers come in two distinct models to meet various needs: Fully Automated, APR-24 and Manual, MPR-24. The Fully Automated Rod Polisher is designed for high efficiency and precision, offering automated control and minimal manual intervention, perfect for large-scale operations. The Manual Rod Polisher provides more hands-on control and is ideal for smaller workshops or specialized applications where flexibility and precision are required.

APR-24 (AUTOMATIC MODEL) CAPABILITIES

APR-24 Rod polisher is a high-quality, reliable machine designed for efficient and precise polishing of rods. It features a manual and automatic full PLC/VFD system, providing greater flexibility and ease of use. With a 10 - 15 horsepower, VFD controlled 1,750 rpm PMAC motor as the spindle drive, 3 - 5 horsepower, 3600 rpm sander drive and ¼ horsepower DC variable motor as the sander head travel drive, this machine allows for easy adjustment of the rpm of the rod, from 0 rpm to 300 rpm.

ROD POLISHER BENEFITS

APR-24

- **Efficient and Precise:**
The APR-24 is designed for efficient and precise polishing of rods, ensuring consistent results every time.
- **Safe and User-Friendly**
The machine features adjustable limit switches and rollers for safety, as well as an easy-to-use control panel.
- **Versatile**
The frequency drive and adjustable sanding belt make this machine versatile for various polishing and repair jobs.
